

Better learning
unlocked

Genio Notes is the #1 note taking accommodation and study tool for independent learning.

Since 2007, our technology has made learning more accessible and empowered over 160k students at 1700 higher education institutions globally to **learn independently**. We unlock student potential by identifying and streamlining the points of unnecessary friction in the learning process, but crucially keep the points of productive friction necessary for students to engage, retain, and learn. We believe students should be **equipped, empowered, and encouraged** to gain the knowledge, skills, and confidence they need to succeed at every stage of life.

Genio Notes helps you meet **ADA compliance for a lower cost and less admin time**. But it's more than just a checkbox. This tool really works:

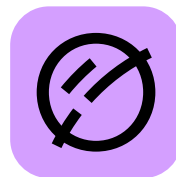

- ▶ **76%** of Genio Notes users improve their grades in just one semester
- ▶ **88%** find learning less stressful
- ▶ **95%** believe their learning skills have improved!

Genio now offers **more for students**

Genio Notes

(Formerly Glean) The #1 recommended note taking accommodation tool

The Confident Notetaker's Masterclass

Embed note taking skills and best practices, tool agnostic

Genio Present

(Coming Soon!) We're currently developing how to improve learner confidence and communication skill

Learning is **at our core**

Learning is tough. Let's face it, it doesn't happen by skipping a step or using technology to do all the work - it requires active participation. With Genio Notes, students find learning a breeze while staying engaged in the process.

We take decades of learning science and turn it into beautifully simple tools that make learning stick. We champion independent learning and don't believe in tools that work on autopilot.

Note taking is a core skill that takes practice and requires students to actively process their learning. We help students develop this skill, so they can create meaningful notes to help them when studying later.

Using Genio Notes, students can take charge of their studies by combining manual tasks with intentional automation, minimizing the waste in learning while ensuring active participation in the process.

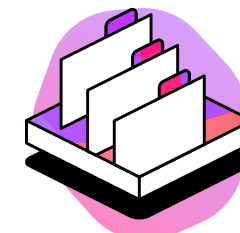

The result? Increased confidence, better grades, and lifelong learning skills that last far beyond graduation.

The learning process

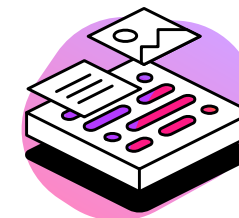

Capture

Focus on active engagement, capturing thoughts and reactions in fleeting notes.

Organize

Process & consolidate information to prevent information overload.

Refine

Create knowledge by focusing on and refining fleeting notes into evergreen notes.

Apply

Use refined notes and quizzes to study for seminars, coursework, or tests.

Engaging in class

Genio Notes lets students capture everything from class, removing the stress of missing important information to allow them to **engage more in the moment**.

1 Audio Recording, Captions & Transcription

Students can capture everything and choose how to engage with the content.

Transcription and Captions available in over 30 languages

2 Import Slides

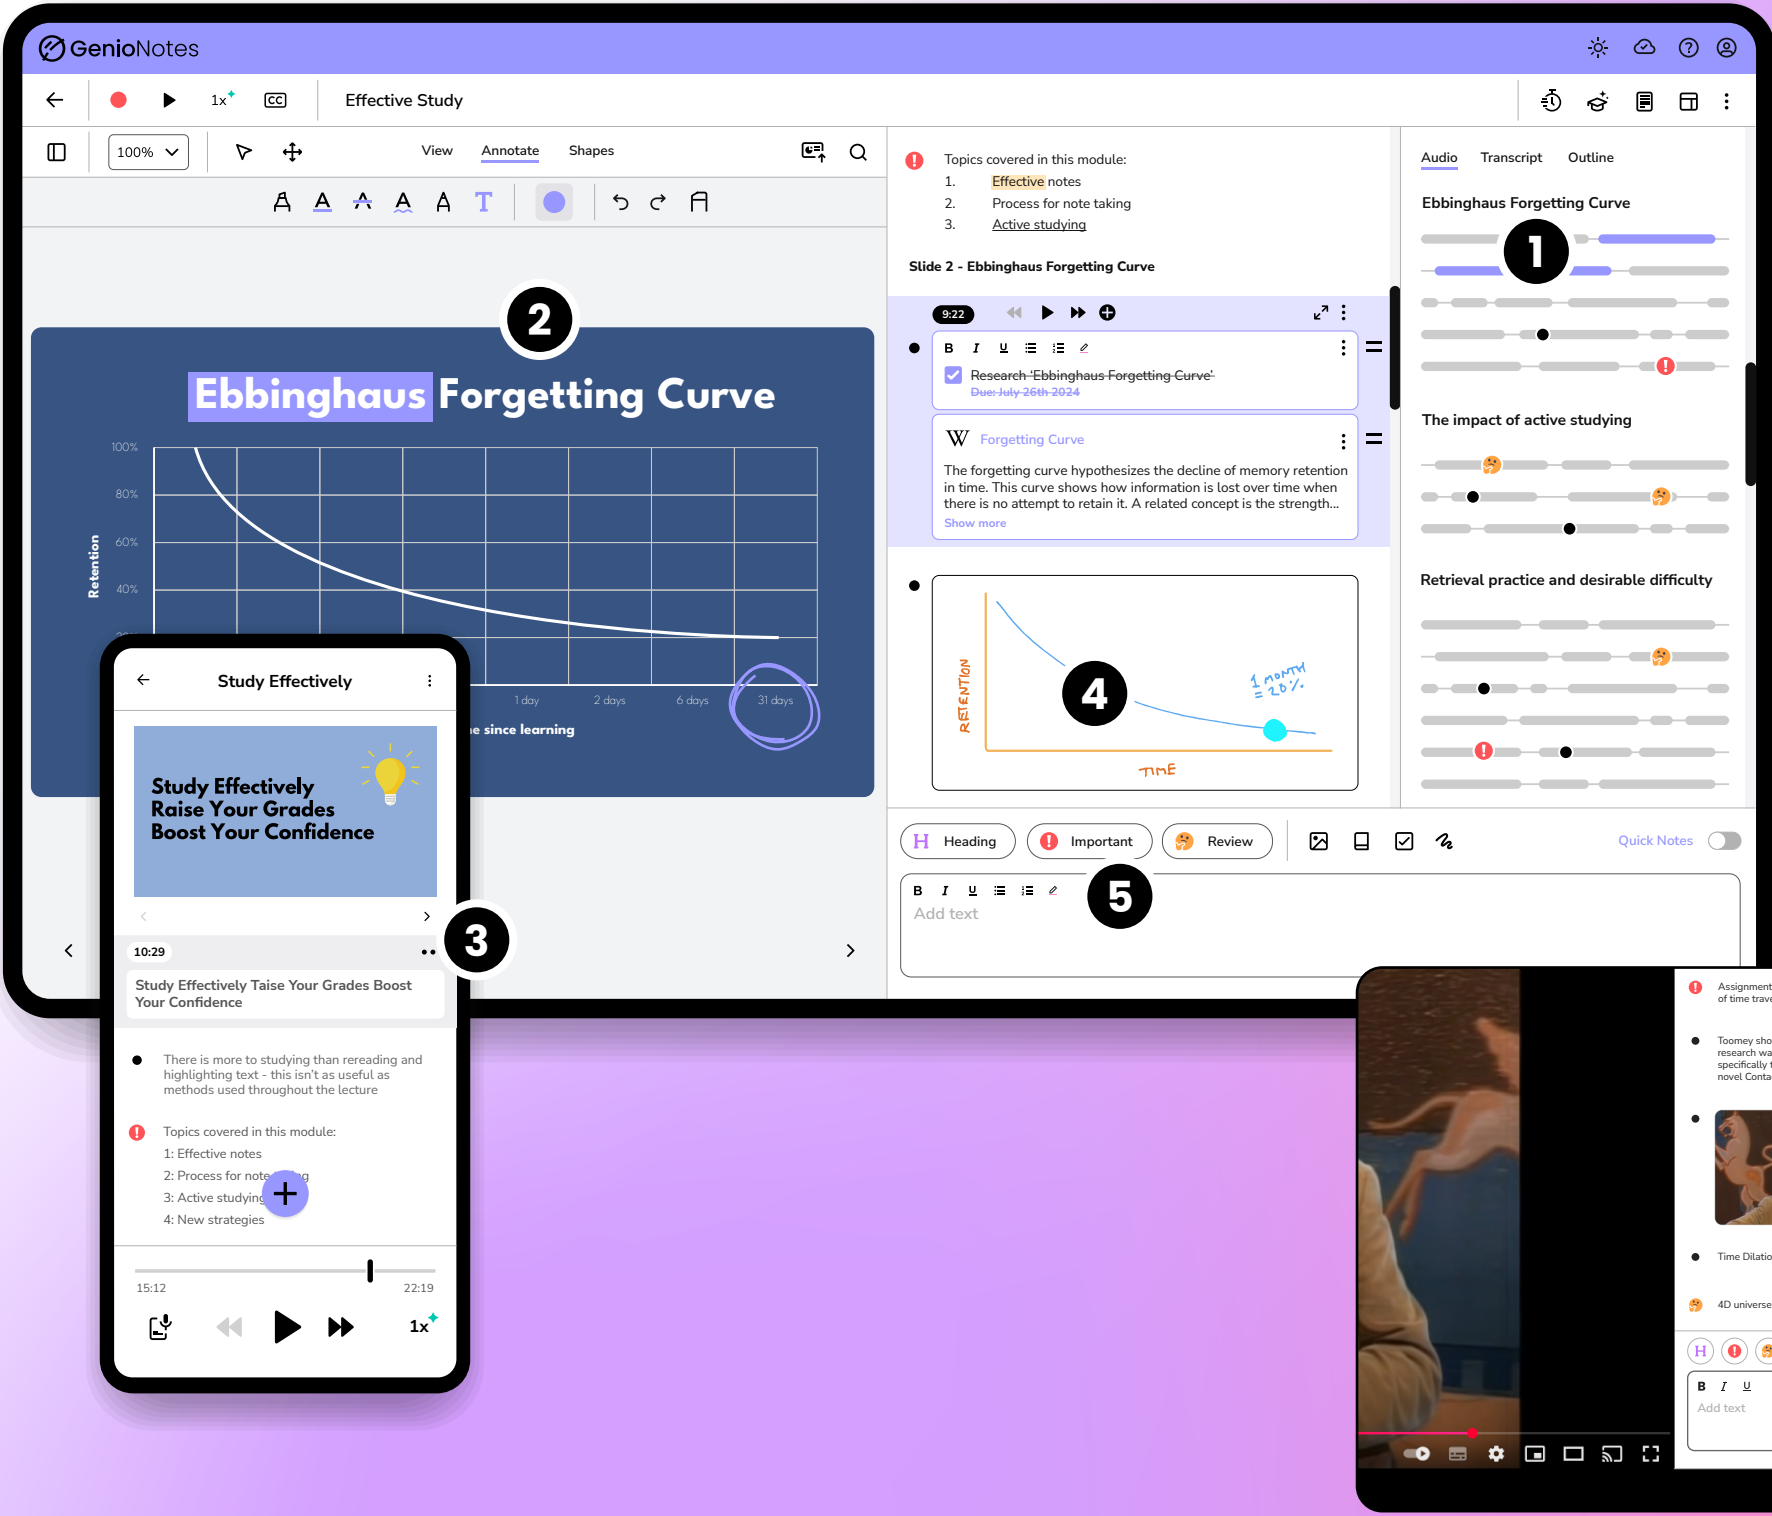

Students can take notes alongside slides, or pull content from slides directly into their notes.

NEW: Import multiple PowerPoint and PDF documents

3 Genio Notes mobile

The Genio Notes mobile app allows more discrete note taking and study on the go.

NEW: View Live Captions on mobile

4 Scribble and Slide Annotations

Perfect for STEM students, Scribble makes noting down equations, diagrams and other visuals easy.

NEW: students can annotate slides directly within Genio Notes

5 Quick Notes

Genio Notes lets learners reduce the cognitive load in class by adding time stamped labels with just one click.

6 NEW: Chrome Extension

Capture online content easily and in one window with the Genio Notes Chrome Extension.

Studying after class

Genio Notes makes studying easier and more effective. Students can organize their notes, refine the content and confidently **apply it to their studies.**

1 Quiz Me

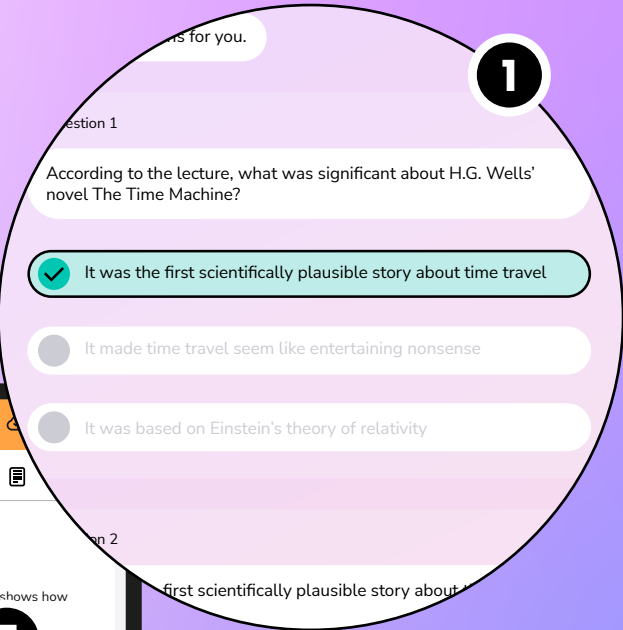

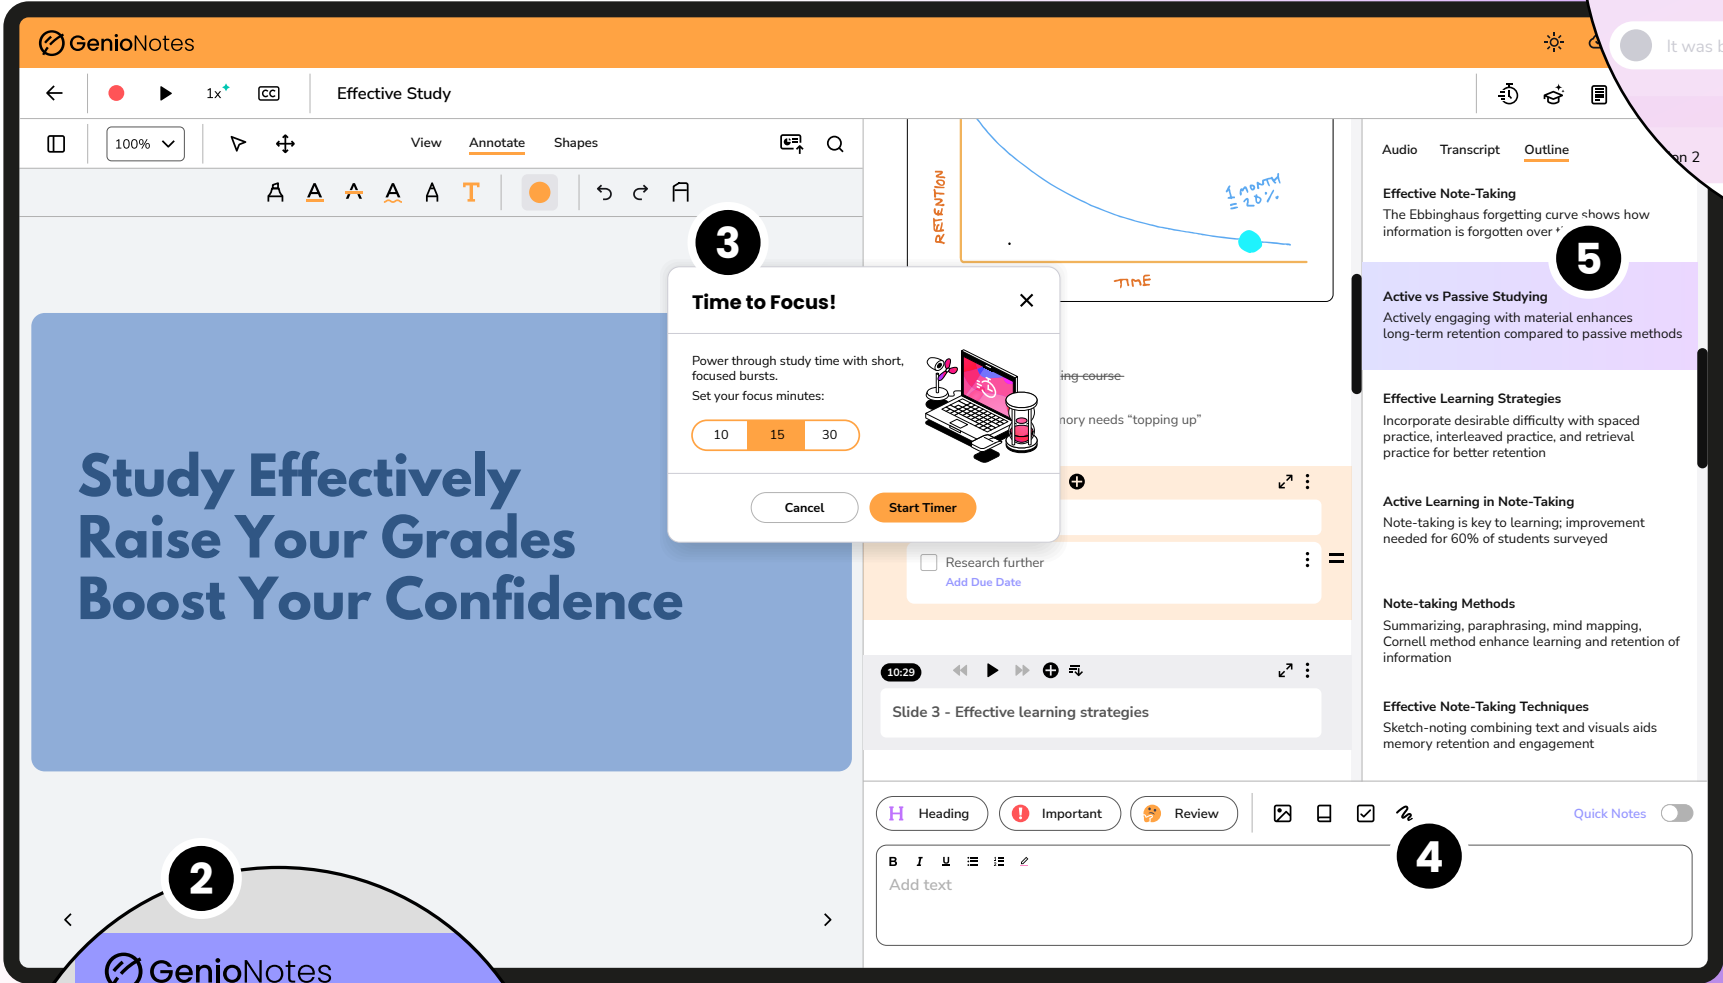

Genio Notes' inbuilt AI generated multiple choice quiz tool allows learners to test themselves on class content and prepare effectively for assessment.

2 Collections and Search

Collections help students stay on top of notes from different classes or subjects, while Search allows them to find Events and Notes quickly.

3 Focus Timer

Students can set a Focus Timer and reduce distractions while they playback audio, complete Tasks, or return to their notes in Reading View.

4 Definitions, Images, and Tasks

Search for Definitions, add Images, create Tasks, and more all within Genio Notes to create better connections between concepts.

5 Outline

Automatically generated sections make returning to the recording and transcript easy. This scaffolds the process of refining notes after class, which adds to the learning experience.

"I enjoy studying more with Genio because I can take it one step at a time without pressure. It's like having a reliable backup that makes learning smoother and helps me move towards success."

Aya, student at Virginia Commonwealth University

NEW

Free with every Genio Notes license

Build note taking confidence with our brand new online course

The Confident Notetaker's Masterclass will teach your students habits and strategies to enhance the quality and efficiency of their notes before, during and after class. Learners will reduce exam stress and improve academic outcomes, without requiring additional resources from your department.

► Flexible and convenient

60 minutes long, 7 modules to complete at your own pace

► Full of interactive content

Audio, video, free-text self-reflections and actionable feedback

► An easily scalable solution

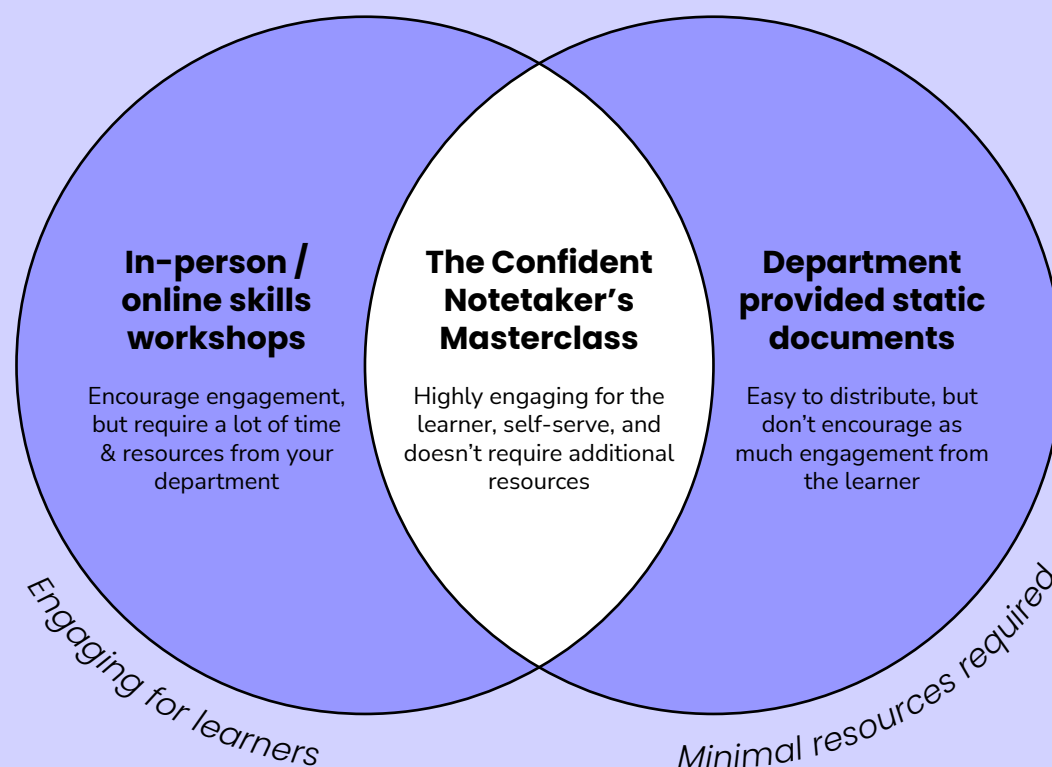

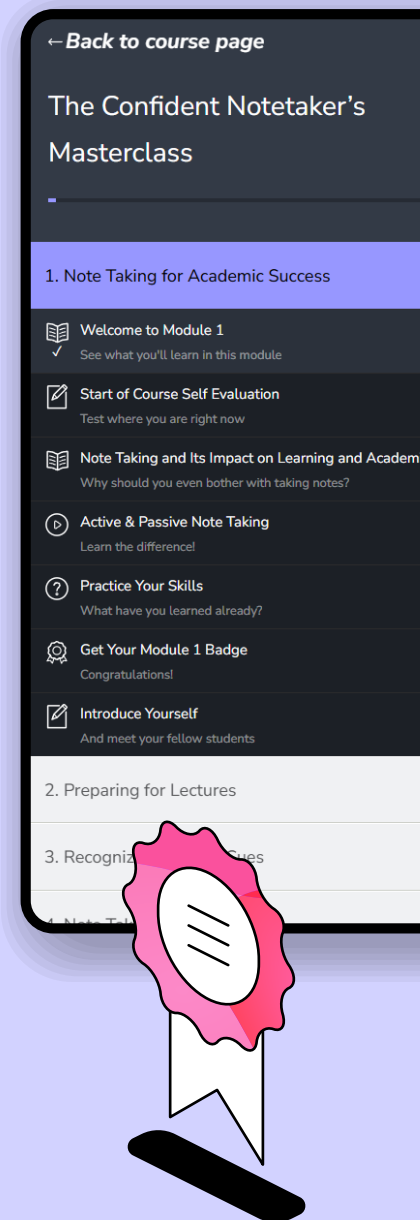

Low-touch with minimal resources required

► Tool agnostic

Learners will find their favorite note taking strategies to use with or without Genio Notes

► Helping you help your students

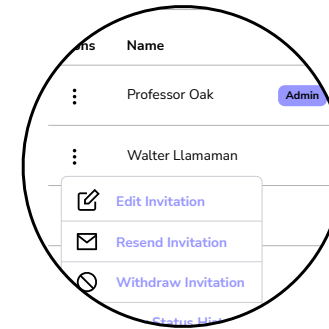

Providing effective training can be time-intensive for your department, and simpler options aren't as engaging for students. Our Masterclass offers the best of both worlds.

Effortless admin tools

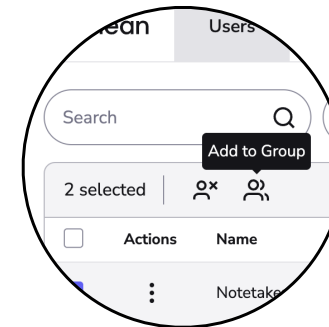

Genio Admin

Invite, monitor and manage access in just a few clicks, taking the stress out of managing note taking accommodations.

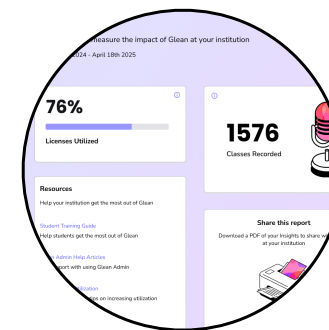

Bulk Actions

Performing common tasks in Admin is now faster than ever with Bulk Actions, which enable you to perform common actions to multiple users at once - from assigning User Groups to editing expiry dates.

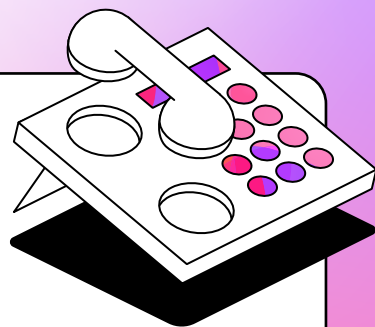

Admin Insights

Easily understand usage and license utilization in a dedicated dashboard, so you can assess Genio's impact and inform potential awareness initiatives.

Support you can rely on

- ✓ Get up & running with our onboarding and training tutorials, regular webinars, and **Skills Portal video guides**.
- ✓ Get utilization insight reports on how students are using Genio Notes.
- ✓ Work with your dedicated **Customer Success Manager** to align Genio Notes to your institution's strategic goals.

Learning technology built differently

One way Genio Notes is different to other tools is through our powerful yet easy-to-use note taking and study features. Another is how we approach building our tool to meet the needs of **both learners and educators**.

✓ Ethical and considered approach to AI and the use of data

We're careful about how we use AI in our products, that's why:

- ✗ We don't sell or rent user data
- ✗ We don't allow third parties to train their AI models on Genio data
- ✗ We don't automatically record, transcribe, summarize, or generate quizzes for users, users must choose to take these actions.

Moreover, we think very carefully about how we leverage AI in our product to ensure it is additive to the learning process. Rather than attempting to automate everything the learner does, Genio is selective about the steps it offloads to AI, and the steps we ensure the student must still do themselves.

We use AI to remove unproductive friction, such as searching through long recordings or transcripts, but retain the productive friction, like the process of synthesizing notes.

✓ Innovation through experimentation and testing

Through an iterative design process based on research with real students, we know our product is solving real problems for learners and educators.

We gather feedback through our 'Genio Insiders' research panel and undertake prototype testing to gather feedback from real students to shape our features. Learners can also opt in to Feature Preview, allowing them to use the beta version of new features to help us gather feedback.

✓ Learning science baked in

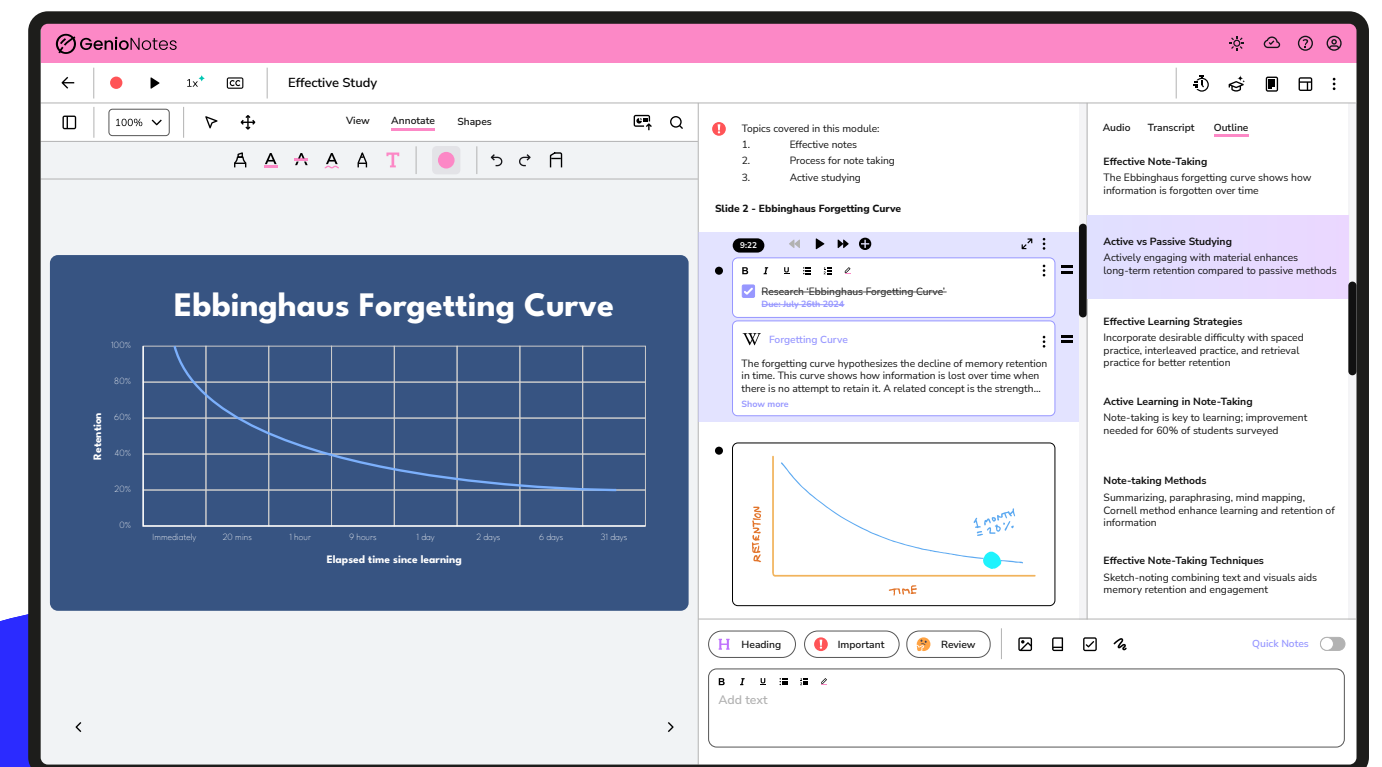

Genio Notes goes beyond traditional note taking to leverage the power of how we learn. Built on learning science principles, Genio Notes minimizes the strain on working memory, allowing students to focus on actively engaging in the lecture.

Genio Notes' approach includes Dual Coding theory by allowing students to capture information through both audio recordings and visual elements including images and Scribbles. Powered by Multimedia Learning principles, which show that combining these elements reduces cognitive load and boosts memory, this comprehensive approach maximizes knowledge retention, making Genio Notes a powerful study tool for academic success.

✓ Accessibility by design

Genio works hard to ensure its products are accessible to learners.

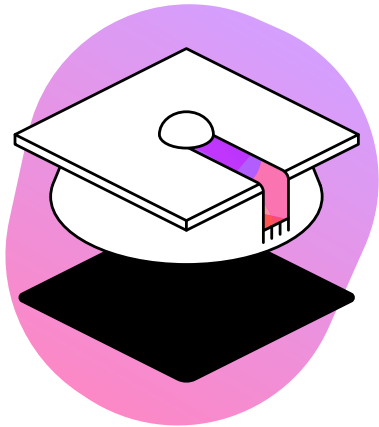

Genio Notes combines essential features such as accessible button names, appropriate color contrast, plus the ability to disable shortcuts and animations, with additional features like Quick Notes and Dark Mode to enhance the experience.

Change the lives of **your students**

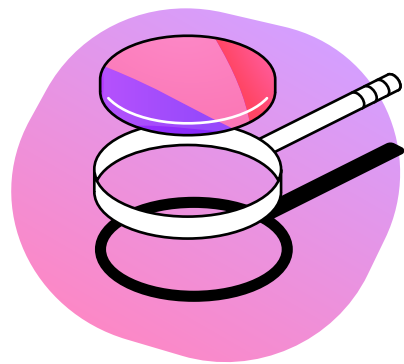

With Genio Notes, students experience reduced stress and improved confidence in learning, supporting their overall wellbeing from their first semester through to graduation.

The quotes below are provided by students with a range of GPAs, from those at risk to high achievers, showing that Genio Notes' impact can be seen across the board!

*"The huge grade improvement from previous semesters (before using Genio Notes) **allows me to be excited about learning** because I feel a lot more confident that it is possible to do well in difficult classes. My midterm exam scores improved tremendously from previous semesters which motivated me to continue with Genio Notes, which in turn, allowed me to keep up with my classes and get a good final grade."*

Michelle, student at Purdue University

"Genio Notes has made me want to study and find the key ideas of class. I dreaded studying because I didn't know where to start but now this has given me a starting point and helps me to stay on track."

Lily, student at Bethel University

"My stress levels were more manageable knowing if I missed something the first time, I could refer back to Genio Notes to listen again. My confidence in studying the correct material increased since I can use the Genio Notes app. I have seen a huge improvement not only in my GPA but in my ability to enjoy learning in the classroom."

Isabella, student at Baylor University

"I recommend Genio Notes anytime I can. I tell all of my classmates about it! It has changed my life and changed the way I retain information. I feel more organized, less cluttered in my head, and more successful. My grades started to reflect and I couldn't be happier!"

Phoenix, student at North Central Technical College

Choosing a package

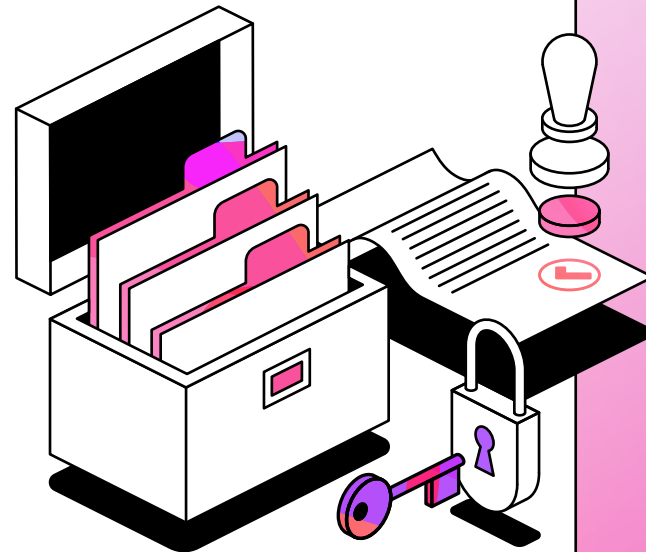

Institution-Wide

Difficulties in the learning process span wider than disclosed disabilities. Not only are some of these difficulties temporary (poor sleep, stress etc.), but as many as **65% of students do not disclose their diagnosed disability**, or receive the accommodations they need. You can reduce barriers to effective study by offering every student, admin, and faculty member a license to use Genio Notes with a cost-effective Institution-Wide license.

With Institution-Wide, you will:

- ▶ Access **enhanced administration features** like JIT provisioning to make onboarding less time intensive for staff
- ▶ **Drive UDL and accessibility across campus** to support all your students becoming better, more independent learners
- ▶ Experience an easy-to-implement, cost-effective Institution-Wide solution at a **lower equivalent cost per student**

Students at risk of failing (GPA < 2.0) saw a **+1.27 GPA increase (79%)** after using Genio Notes

Department

If you want to cover your note taking accommodation requests with an alternative to peer note taking that allows students to learn more independently, Genio's Department package is for you.

With a department license, you can:

- ▶ **Improve the learning process** for your students with disabilities with a more cost effective alternative to peer notetakers
- ▶ Level the playing field and help 85% of your DSS students become **more confident learners**
- ▶ **Relieve the pressure from staff** in your department, with enough licenses to cover all accommodations and access to Genio Admin to manage it all.
- ▶ Help 85-90% of your students improve their **confidence, stress levels and grades.**
- ▶ **Increase return on investment** for your accommodation provision at a time when budgets are increasingly tight
